-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1714

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30, 32, 36-38 and 40-45 are rejected under 35 U.S.C. 102(b) as anticipated by Moore, Jr. (US 3,752,679).

Moore, Jr. teaches a composition comprising 64.5 wt% of molochite (inorganic refractory grain), 10.65 wt% of (colloidal) silica and 24.85 wt% of water at col. 10, lines 26-30. Said 24.85 wt% of water meets the instant amount of "about 25 wt%" in claim 45. Also, the example 6 shows 50 wt% of molochite (inorganic refractory grain), 15 wt% of (colloidal) silica and 35 wt% of water

Thus, the instant invention lacks novelty.

Claims 30, 32 and 36-45 are rejected under 35 U.S.C. 103(a) as obvious over Moore, Jr. (US 3,752,679).

The claim 39 recites a moisture content of 25-27 wt% over Moore, Jr. who teaches 24.85 wt% of water and various amounts of water in examples. Colloidal silica

Art Unit: 1714

has a solid content of 25-40 wt% (col. 4, lines 16-26), and thus the use of colloidal silica having a solid content of 25 wt% in Slurry b of example would meet the instant amount.

It would have been obvious to one skilled in the art at the time of invention to adjust amounts of components in examples of Moore, Jr. since Moore, Jr. teaches such modification.

Claims 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H. Yoon whose telephone number is (571) 272-1128. The examiner can normally be reached on Mon-Thu.
